Eat well. Digest better. A lot occurs inside our gastrointestinal (GI) tract after we eat, including digestion, nutrient absorption, and the elimination of waste. Many of these functions are carried out by naturally-occurring bacteria. Poor diet, age, stress, and antibiotic use tend to deplete our natural intestinal flora, leaving us vulnerable to 'unfriendly' bacteria and other toxins that can cause discomfort or more chronic conditions.

The good news is that probiotics can help us replenish our 'friendly' bacterial cultures. Univera's advanced AloeDophilus formula delivers 13 billion cfu (colony-forming units) of beneficial bacteria along with nourishing compounds to support their proliferation. AloeDophilus also contains Aloe to further enhance gastrointestinal health, as well as pomegranate extract, the superfruit that provides antioxidant protection and added immune strength.
